

BRANDON PLENTL

Senior Full Stack Engineer

A: 4904 HotSprings Trl, Ft. Worth, TX **P:** (214) 546-8271 **E:** bplentl@gmail.com **L:** www.linkedin.com/in/MrPlentl

OBJECTIVE:

Senior Full Stack Engineer with 15+ years of experience designing and deploying scalable web applications using ReactJS, NodeJS, PHP, and RESTful APIs. Seeking to join a collaborative team focused on building modern, high-performance applications using the latest technologies and best practices.

SKILLS:

15+ yrs:

- PHP (OOP, Laravel)
- HTML5 & CSS3 (Responsive Design)
- UI/UX Best Practices
- Apache Web Server Config
- SQL Databases (MySQL, PSQL)
- LAMP Stack Deployment
- Version Control (Git, GitHub, SVN)
- Customer Support

7+ yrs

- ReactJS (Hooks, Context API)
- NodeJS (Express, RESTful API)
- JavaScript (ES6+, API Integration)
- RESTful API Design
- API Testing and Documentation
- WordPress (Theme & Plugin Development, Deployment)
- Project management

3 yrs:

- CI/CD Pipelines (GitHub / Jenkins)
- Golang
- Authentication (JWT)
- Docker

WORK EXPERIENCE:

IBM Cloud, Dallas, TX

March 2018 – Present

Full Stack Software Engineer

Microservices & Distributed Systems

- Architected and deployed core components of the IBM Cloud Support Center, a large-scale internal platform built with ReactJS and NodeJS, integrating with enterprise systems such as ServiceNow and Salesforce.
- Designed and implemented RESTful APIs to support real-time communication and cross-platform data synchronization between internal tools.
- Developed backend microservices and integrations using NodeJS focusing on scalability and maintainability.

Cloud Infrastructure & DevOps

- Automated CI/CD pipeline automation using GitHub Actions and Jenkins, improving deployment reliability and reducing delivery time.
- Performed database migrations and optimizations across Oracle, MySQL, and PostgreSQL environments.

WORK EXPERIENCE (continued)

Frontend & Platform Development

- Built internal tools for leadership, automating configuration updates and cross-system data synchronization, reducing manual workload by 99%
- Collaborated across multiple teams to plan, prioritize, and deliver software releases within an Agile/Scrum environment.

Daystar Television Network, Bedford, TX

April 2011 – February 2018

Webmaster / PHP Developer

- Developed all Daystar company websites (15+) including the flagship site
- Created the online Giving platform with an Admin Dashboard and Reporting
- Engineered API Integrations for Zip Code search and the Online Schedule
- Built an On Demand platform by integrating with our Video Hosting Provider
- Email Marketing using MailChimp (Campaign Creation and List Management)
- Online Support for all websites, Giving platform, Live Stream and the eStore
- Maintain and Oversee Online Stability of Systems
- Customer Support for services through phone calls and email
- AWS / Azure Cloud Integrations and Server Deployment

DataVoice International, Allen, TX

2006 – 2010

Development / Tech Support / Project Manager

- PHP code maintenance on production software
- MySQL database design, management and optimization
- Responsible for upgrading clients with new software
- Web Design (Company website & Support Portal)
- C# used to create automation utilities
- Telephony / VOIP
- Networking / Firewall Management
- Customer Support

EDUCATION:

Software Applications and Programming

March 2005 – June 2007

ITT Technical Institute, Richardson, TX

Relevant Coursework

Object-Oriented Programming (Java, C++), DB Design, Web Development
